PROFESSIONAL SUMMARY

Web Developer, Digital Project Manager, and AI Integration Engineer with 15 years of experience leading the design, development, project management, and launch of 350+ websites, web applications, and software solutions across educational technology and agency environments. Combines front-end development expertise, end-to-end project delivery, and hands-on Claude API and Claude Code integration experience, including designing and shipping an autonomous agentic job search system. Recognized by colleagues and clients for problem-solving ability, delivery focus, and strong client communication, with 9 professional recommendations on LinkedIn.

AREAS OF EXPERTISE

Project Management • Web Development • Stakeholder Management • WCAG 2.1 Compliance • Agile / Scrum • AI Integration • Claude API / Claude Code • Cross-Functional Leadership

TECHNICAL SKILLS

Languages and Markup: HTML5, CSS3, SCSS, PHP, JavaScript, jQuery, Python, Node.js

AI and Automation: Claude API, Claude Code, Anthropic SDK, agentic task execution, multi-agent dispatch, prompt engineering, cron-based scheduling, LLM-powered workflow automation, AI-assisted code generation

CMS and Infrastructure: WordPress, Shopify, HubSpot, Squarespace, Wix, Webflow, Jekyll, Divi, Elementor, VPS deployment, Docker, Tailscale, Linux systems administration

Design and Standards: Figma, Adobe Creative Suite, WCAG 2.1/ADA Accessibility, Cross-browser Testing, Responsive Web Design, SEO, Google Analytics

Project Management Tools: Jira, Confluence, Trello, Monday.com, Google Workspace, Microsoft Office Suite

WORK EXPERIENCE

Skyrocket Education — Pasadena, CA

October 2022 – September 2025

Web Developer and Project Manager

- Served as primary developer and project manager for 50+ educational institution websites, owning project timelines, deliverable tracking, and stakeholder communication from intake through ongoing support
- Directed end-to-end implementation of an integrated online enrollment system using PHP and REST API integrations, enabling year-round student registration and application processing
- Served as primary client contact for 50+ accounts, managing support queues and ongoing maintenance priorities using Agile workflows
- Applied Claude Code and AI-assisted automation to streamline status reporting, reduce manual overhead, and accelerate delivery across a high-volume project portfolio

Edlio — Los Angeles, CA

February 2015 – March 2022

Front-End Web Developer and Production Coordinator

- Led front-end development, project management, and website redesign of 350+ educational websites built on Edlio's proprietary Java and PHP platform, from conception through deployment
- Designed and built a customer-facing project portfolio platform, streamlining the sales pipeline and reducing time-to-proposal for new client engagements
- Developed and tested codebases aligned with ADA and WCAG 2.1 accessibility compliance requirements across all client projects
- Served as primary technical liaison between clients and internal development teams, translating business requirements into actionable project specifications

Additional Experience

Production Coordinator, Aurora — Hollywood, CA (August 2010 – March 2012)
Office Manager and Production Coordinator, Nouvelle Vague LA — Venice, CA (April 2013 – March 2014)
Office Manager and Training Advisor, Escape Studios — Los Angeles, CA (February 2012 – November 2012)
Interactive Project Coordinator, LaunchCode — Los Angeles, CA (July 2009 – September 2009)

EDUCATION AND CERTIFICATIONS

California State University, Fullerton	Bachelor of Fine Arts (BFA), Graphic Design
General Assembly	Front-End Web Development Certificate
UCLA Extension	Web Design II: JavaScript and jQuery
Anthropic Academy	Building with the Claude API (<i>In Progress</i>)
Anthropic / Self-Directed	Claude Code — AI-Assisted Development & Agentic Task Execution (<i>Ongoing</i>)

PORTFOLIO PROJECTS

job_agent — Autonomous Job Search Agent.
Autonomous Claude Code agent deployed to a self-hosted VPS. Queries JSearch and Adzuna APIs, filters results against structured criteria, and writes dated markdown reports. Headless dispatch via cron. Demonstrates agentic orchestration, API integration, and infrastructure-as-markdown patterns.
